

PIGGING AND DECOKING SERVICES

USA DeBusk is focused on being the best turnaround cleaning specialist in the Refining and Petrochemical Industry. New equipment, new technologies and innovative products, combined with experienced professionals make us the preferred up-and-coming industrial services company.

Our Decoking units are specifically designed with maximum safety and efficiency in mind. Units are 100% self-contained to prevent unplanned spills and incidents

Our commitment to the safety of our personnel and quality of our equipment means that the job will be done right the very first time

ELITE TEAMS, RELIABLE RESULTS

USA DeBusk's Pigging and Decoking division is a dynamic team that brings two decades of decoking knowledge to the DeBusk group. These experienced veterans also bring:

- » A management team that has served customers throughout the U.S. and Canada for more than 20 years.
- » Ongoing intensive, hands-on training and mentoring for all team members.
- » "Whole Unit Cleaning Specialists" that will provide project design, engineering, timeline, cost reviews and verifiable results for all services.
- » Engineered techniques to save time and money while using the safest methods possible to accomplish the results that clients deserve.
- » Superior reputation for planning and managing projects safely while meeting turnaround objectives.
- » All-inclusive 24/7 Pigging services
- » Effluent filtration units
- » Smart Pigging capabilities
- » Cost savings analysis services

USA DeBusk has commissioned the build of the most advanced and innovative pigging and decoking pumpers in the North American marketplace. These custom twin and triple pump configurations are like no other pumpers in the U.S or Canada. These custom engineered pumper units are coupled with the most diverse selection of decoking pigs available in the world.

PIGGING AND DECOKING SERVICES

PUMPER UNITS INCLUDE:

- » 2-3 High Flow pumps and 2-3 Cummins Engines on a single trailer
- » Cummins QSL9 (333hp) Tier4F Engines
- » The next generation of automation and operator interface in the pigging industry.
- » HD camera system for remote viewing by customer (DeBusk pigging portal)
- » Custom pump suction design for improved flow
- » Unique piping design for efficiency and ergonomics
- » Recessed stairs for pumper access and safety
- » Redundant compressor configuration
- » Custom drive to pump design
- » LED lighting for clear visibility
- » Maximized effluent discharge
- » USA DeBusk designed and fabricated tandem axle trailers, for weight distribution.
- » Custom steam line injection
- » Guided radar tank level indicators with automated shutdown pre-sets
- » Operator designed aluminum baskets
- » Concealed stairs and access points
- » In house coke transfer shoots for efficiency
- » Sloped tanks for increased coke removal
